Roblox works best over Wi-Fi. Jul 22, 2021 Version 2.487.426768 To make Roblox work better for you, we deliver updates regularly. These updates include bug fixes and improvements for speed and reliability. This isn't a full criticism, due to the fact that I don't play every single game that's popular I Roblox. I have been playing since 2014, and like every young kid back then, got my account hacked. I contacted Roblox and they didn't do anything about it, but that's not really an issue because it was my fault for having it hacked. There used to be way too many games to count that would trick kids into giving away their password and other details, and luckily Roblox has been working on fixing that. One of the biggest issues I have though is about the report system, they don't do anything. This game's demographic is young teens, so it's only natural for them to be rude. But the thing is, you can't report people and actually have things happen. Another thing is, the sex games. Like I've said before, this game is for teens, so we're bound to find these games once in a while. But I believe there should be more going on to stop this, for example, the chat filter being removed. There should be an option to remove the filter, and then have the game checked before it can get published. Besides that, a lot has changed like egg hunts being abandoned, rthro being pushed in (even though most people do not care for it) and more concerts happening. If you have a child, be a real parent and monitor what they're doing/ watching, just cause it's a children's game doesn't give you the right to put the blame on everyone else. I think roblox is just amazing!! The programming is so good, and I honestly play it about every day!! But just like other apps, it does have some problems. First, the reports that you put in DON'T WORK. Whenever I report something, it says they will try to fix it but nothing happens! Also, some of the games are laggy and are make for computers. I do SOMETIMES play Roblox on a computer, but other times I don't so for games that are made for computers, I can't play and it makes me sad. Another thing is some of the games are inappropriate for kids! Some games have INFLATION or SEX in them! That is WAY too inappropriate for kids!! Also, I sometimes see people finding ways to MAKE IT LOOK LIKE THEIR TRYING TO MAKE BABIES BECAUSE THEY CANT DO OR SAY STUFF ABOUT THAT. Now also another problem is that all the things that you say like your age... it gets hashtags! I mean- people CAN say their age, but they just shouldn't say their address or phone number. They can say their age without people finding out where they live. Also, I think Roblox CAN be for kids and not just for 12+. Why? Well it's because at least if a kid is being watched by their parents/guardian, roblox actually could be for kids! If changes could be made, I would absolutely love that! Thank you and I hope you understand! Also, sometimes I have problems playing the games on Roblox because it always says that my internet is not on, but I have internet! I love this game it is amazing but I also have some things that you could fix and some suggestions as well. 1. The reporting system, I love the idea that you can report people if they have done something rude to you but you never really know if Roblox actually reads your report because you never get any notifications so please add something that will alert you when your report has been read whether it's that day or 9 months later. 2. The number of friends I like the idea that you can friend people so that you can stay in touch with them but there is a certain limit (200) so it is not very fun when someone wants to friend you and you want to as well but you are at the friend limit. Can you please at least possibly make it 300 maybe 250? 3. I have a suggestion where if there is a person who has been reported on more than 5 different games more than 3 times they should get banned for a month to teach them that it's not ok to do that but also not ban them forever if they get reported in 5 different games more than 3 times 3 times then you ban them permanently from all the games they were reported in. 4. I think that you should not let any people that have gotten their account deleted create more than 5 more accounts because they may keep doing the same thing they did before and if they create another account keep a monitor on them so that they can be watched just in case they do that same thing again and so that they can still play. I'm sorry that this report was so long @ The developer, Roblox Corporation, indicated that the app's privacy practices may include handling of data as described below. For more information, see the developer's privacy policy. The following data may be collected and linked to your identity: Purchases Location Contact Info User Content Search History Identifiers Usage Data Diagnostics Privacy practices may vary, for example, based on the features you use or your age. And now you can play various games on your Android device.Play your favorite Roblox games on the go with the Roblox Android application. Customize your character and venture on new worlds. One app to rule them all, one application to play all your favorite games on. Roblox is a unique platform where users such as yourself can create their own worlds and allow the public or only their friends to test it out. However, the creation of these worlds and rooms is only available on the desktop application called Roblox Studio. Being a version ported to mobile, you won't be able to play requirement heavy games and loading into many other worlds will take a few moments. While you can't tinker and adjust the coding of your world, you're still fully capable of entering it and many others with the Roblox Android application. Run, jump and dash out of the way of obstacles in one of the many obbys available, or become a lord of enterprise as you battle fellow players in a colorful tycoon game. There are many activities available for you to compete in, such as hide and seek, various adventure RPGs, and multiple shooters. Visit the Robux store, spend some money and unleash your inner fashionista as you dress up your avatar to perfection. Once you're fashionable and ready, you can meet up with friends in a social world or challenge them to a few games. Where can you run this program? Roblox is available for all Android and IOS devices and has similar programs for desktops.Is there a better alternative?No, there is no other platform that lets you create and enjoy those creations as easily as Roblox does. The only way to enjoy the experience more is to play it on a computer.Roblox is a fun and engaging way to spend your afternoon. You'll join other players' creations and customize your own avatar. Should you download it? Yes, this is a great application if you're looking to enjoy a wider range of mobile games.HighsPlay on the goLarge selection of gamesDress up your avatarLowsSlow loading timeCan't run many gamesLimited features Roblox is a set of virtual worlds, which have been designed in Lego-like pixelated form. The gaming suite, primarily focusing on designing adventure games, suits all age groups. While the platform received much attention on Windows PCs, Roblox for Android is an excellent choice to get started with creations. Endless possibilities and creationsUnlike traditional games, such as Minecraft and Hello Neighbor, Roblox has been designed as a suite for creating virtual worlds. The platform emphasizes creating and sharing everything online. With Roblox Studio, you can build structures, design complex buildings, collect resources, and choose avatars to develop your own storyline.The biggest advantage of the Roblox app is the availability of thousands of free user-generated titles. Currently, more than 100 million users enjoy the app on a monthly basis, making Roblox one of the leading game development platforms.How to use Roblox?Once you sign up, the program provides you with customizable avatars, characters, in-game real estate, and other benefits. Though the free version comes with limited features, it's sufficient to create worlds from scratch and have a good time developing a wide range of games. For inspiration, you can check out the thousands of creations from other people around the world.Upon sign up, the platform requires you to create an account. This includes the choice of an avatar. You're assigned a piece of real estate in one of the worlds, where you hold necessary items to construct structures. The interface is simple and has been designed to appeal to the younger generation.Once you start creating the worlds on the platform, you're provided with a wide range of choices. While Roblox is safe for children, it is a comprehensive game suite to play, communicate, and collaborate.Although the application is free to use, there's a 'Builders Club', which comes with various subscription offerings. These in-app purchases offer avatar upgrades, removing advertisements, and managing multiple virtual worlds. Overall, in-app purchases are targeted towards improving your gaming experience, so you can spend more time on the app. Roblox also uses Robux, the in-app currency. With Robux, you can further acquire building materials, get the right set of tools, customize avatars with shirts, hats, and faces, attain special abilities, and perform other tasks with ease. What about the creations?Every world in Roblox for Android has been created by a user in some part of the world. There are millions of choices, and you can spend hours exploring loads of content. While some players focus only on creativity, others like to play around in these creations.The choice of content ranges from complex structures to simple design tasks. There's even an intuitive search function, which lets you find creations and games without much trouble. This is an excellent feature for kids and younger players, letting them browse through multiple options within minutes.On Roblox app, you can play with almost anything you can imagine. The huge collection includes adventure games, shooters, racing games, MMOs, RPGs, and more. With so many options in the library, Roblox has been able to captivate many users across the globe.The experiences you share on Roblox aren't limited to interactive games. You can also view short films, animations, and other kinds of creations.It's worth mentioning that creators use a unique programming language, Lua, for developing games. It can be used to transform a simple or static sequence into a fast-paced game. Simply put, a detailed virtual world in Roblox can go from minimal yet aesthetically appealing to complex and vibrant.What about the graphics?While Roblox is perfect for kids, adults might not like the pixelated worlds in the game suite. The primary reason is that the app focuses on user-generated content, which can be patchy and amateurish. Compared to some amazing games like Gacha Life and Gacha Club, Roblox's creations often have blocky visuals and blurred colors. Having said that, since the platform prioritizes Lego-like content, this seems to be intentional.Though the audio isn't too engaging, it keeps you interested in the games. Once again, the range of music goes from commonly-used background score to interesting creations from experienced developers. There's no typical sound theme, and every world comes with a different set of sounds. If you're not expecting Roblox to match the creations from big production studios, you won't have any issues with the audio choices.Is Roblox safe for children?While Roblox app has been designed for players of all ages, it's recommended to supervise younger players regarding usage. Since the platform's foundation is user-generated content, the application prioritizes social interactivity. In the past, there have been a few instances of bullying. Children have also come across inappropriate content. Fortunately, Roblox has moderators working round the clock to limit issues from occurring.Players use Roblox for Android as an endless hub of user-generated content. The simplistic world of gaming can quickly become complex, depending on what the player likes to do with the suite.Overall, Roblox is an excellent choice for developing games, exploring virtual worlds, and fostering creativity among kids. Loads of engaging and interactive contentRoblox is a revolutionary platform, letting kids create virtual worlds from imagination. These can be shared online with friends. With a huge community, the platform releases regular updates, improvements, new content, and upgrades. The program is safe for kids, and technically confident children won't experience any issues with the vast range of creations. Whether you're considering Roblox download for playing games or browsing through its variety of online worlds, it will definitely turn out to be a good choice.
