# canon gl1 service manual pdf

Digital Video Camcorder, DMGL1 and Compact Power Adapter, CA910A This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions 1 This device may not cause harmful interference, and 2 this device must accept any interference received, including interference that may cause undesired operation. Unauthorized substitutions may result in fire, electric shock or other hazards. By connecting the GL1 to your computer, you can capture still or motion images on your computer commercially available IEEE 1394 computer interface board required. You can also obtain genuine accessories for your Canon camcorder by calling 18008284040, Canon U.S.A. Information Center. Battery Packs Extra batteries for use with the GL1. When you use the optional BP930R without the. This mark identifies genuine Canon video accessories. When you use Canon video equipment, we recommend Canonbrand accessories or products bearing the same mark. Provided accessories WLD73 Wireless Controller. Open the velcro and slide the lens cap cord to the position shown in the illustration. When replacement or repair of any product including power supply is required, please return it to the nearest authorized Canon Service Center and have it repaired or replaced with the same number product or equivalent. This automatically switches the LCD screen on and the viewfinder off. When you close the LCD panel, the LCD screen automatically switches off and the viewfinder switches back on. About the LCD Screen The LCD screen built into this camcorder is a high precision product. However, small black dots or bright points of light red, blue or green may appear constantly on the LCD screen. Builtin speaker and headphone terminal The camcorder has a builtin speaker and a headphone terminal so you can review the sound track alongside the picture during playback. Use the speaker or headphones when viewing playback with the LCD screen, and use headphones when viewing with the viewfinder. <http://dyglas.com/userData/board/hydra-cell-pump-manual.xml>

Press and hold to play back continuous frame advance. You will need to attach a power source to the camera see p. 16. See your TV or VCR instruction manual for further details. If necessary support the camera with your left hand. With practice, you will be able to operate the controls by touch, without taking your eye off the action. For a more interesting picture, try to position your subject so it is slightly to one side. Leave some space on the side of the frame that the subject is facing or moving towards. However, the GL1's Optical Image Stabilizer allows you to obtain steady recordings even at high magnification. Unlike electronic image stabilizers, it causes no loss of picture quality. The Optical Image Stabilizer can compensate for a wide range of camera movement —. You must first pause recording before the functions in the menus can be changed. There are two main menus 1. Camera menu when the camera is in record pause mode the POWER switch set to CAMERA and the standby lever set to STANDBY 2. The tally lamp lights up to let you know that the camera is in range and responding to your commands. The wireless controller and the camera have to be set to the same mode in order to be compatible. However, its flashing may be reflected into the lens during closeup recording, or when recording through glass. You may therefore decide to turn it off. If you are at another time zone, select your time zone first and daylight saving time DST setting if necessary. However, it resets to the off setting if you slide the POWER switch to OFF. You can take a still picture at any time during regular video recording, or you can put the camcorder into record pause mode first, then take a still picture. This is useful when you want to add a new scene to a

previously used cassette. The name of your selected recording program appears constantly on the left of the display, with the exception of the AUTO Recording program whose n mark is displayed and then disappears after 4 seconds. <http://www.bluwash.co.kr/userfiles/hydra-mac-skid-steer-manual.xml>

If you use the STANDBY lever, however, the camera remembers your chosen values. Manual See also p. 55 Select this program for total creative freedom when operating the camcorder. You can set aperture and shutter speeds completely independently to give you exactly the exposure you require. Except for the fade trigger, all digital effects can be used for both still photos and video, and sound is recorded normally. Fade Trigger When you start recording, the scene gradually fades in from a black screen. If you are using the wireless controller, the F mark starts flashing immediately after you press the photo button. The camcorder takes the picture for approximately six seconds. If you slide the POWER switch to OFF or the standby lever to LOCK, the camcorder resets to auto exposure. This allows you to compensate for backlit, overexposed scenes. 1. Turn the program selector to the Auto, Tv or Av recording program. 2. Use as a guide to setting the aperture iris and shutter speed. Although slight variations are unavoidable, colors will appear natural in virtually every situation. In some cases, you will get better results by setting the white balance yourself, or using one of the two preset modes T Indoor Mode. Make sure the camcorder's infrared control signals can reach the VCR, and the VCR is in record pause mode. Ready to record and on pause. 1. The number indicates the VCR brand. The letter indicates the set of signals. Brand Settings Canon 1A to 1C Aiwa 2A to 2C. Preparations 1. Connect the camera to the VCR. When you are recording from the GL1, make sure you connect the cable to the GL1 before connecting the other end of the cable to the recording device. When you are recording to the GL1, slide the POWER switch to VCR and press its 2 record and a pause buttons down simultaneously, or press the REC PAUSE button on the wireless controller "DV IN".

If your tape hasn't been recorded with 12bit sound, we recommend dubbing your original tape onto a blank tape using the GL1's analog linein function, then dubbing audio onto the new tape. Make absolutely sure to set the audio mode of the new tape to 12bit and the recording mode to. Store the camera with the viewfinder flush with the body of the camera. Remaining time indicator Tells you how many minutes of power remain in the battery pack. If it is stored, however, it slowly discharges and eventually in excess of 6 months from being fully charged there will be insufficient power to maintain the date and time. Avoid sudden changes in temperature. Contact your Canon dealer for information about plug adapters for overseas use. Using the camera while condensation is present can damage both the tape and the camera. Condensation may become a problem When you take the camera from a cold place to a warm room When the camera is left in a humid room Protecting the camera from condensation. Possible explanations are given for each problem on the list — turn to the page numbers in brackets for more information. Make sure that the camera is properly connected if you are using it with a TV or VCR. Consult your dealer or service outlet if problems persist. In these situations, you will often get better results using manual focus see p. 58. Focus on something which is about the same distance away, lock the focus, and then point the camera at your original, hardtofocus subject. Horizontal stripes Without much contrast e.g. It is reset automatically when a new tape is loaded. In camera mode, the frame number doesn't appear in the display. Errors and omissions excepted. Subject to change without notice. Canon is a trademark of Canon Inc.

Each Canon DV Camcorder, when delivered to you in new condition in its original container, is warranted against defective material or workmanship as follows for a period of one 1 year from the date of original purchase three 3 months in the case of the video head part, defective parts or DV Camcorders returned to a CUSA factory service center "CUSA Center" NATIONAL HEADQUARTERS 6390 Dixie Road, Mississauga, Ontario L5T 1P7 CANON CANADA INC. Canon brand peripheral equipment and software which may be distributed with, or factory loaded on, the Equipment, are sold AS IS without warranty of any kind by Canon USA, including any implied warranty regarding merchantability or fitness for a particular purpose. The sole warranty with respect to such nonCanon brand items is given by the manufacturer or producer thereof. If the Equipment contains a hard disk drive, Canon USA recommends that data stored on that drive be duplicated or backed up to prevent its loss in the event of failure or other malfunction of such drive.

Canon USA shall have no responsibility under this limited warranty for use of the Equipment in conjunction with incompatible peripheral equipment and incompatible software. In order to obtain warranty service, contact the authorized Canon retail dealer from whom you purchased the Equipment or call the CANON INFORMATION CENTER AT 1800OKCANON. You will be directed to the nearest service facility for your Equipment. This Limited Warranty covers all defects encountered in normal use of the Equipment and does not apply in the following cases This warranty does not cover units sold to rental firms, military operations, hotels, schools, hospitals or for other commercial, industrial, or institutional applications. These uses are covered only by such specific warranty as Canon may issue with such sales. This Limited Warranty does not apply to accessories or consumables for the Equipment, which are sold "AS IS", without warranty of any kind by Canon USA. Please retain this warranty card and your Bill of Sale as a permanent record of your purchase. This card is most important in order to be sure you are contacted right away should there be a safety inspection, modification or product recall under applicable laws or regulations. This limited warranty is only effective upon presentation of your Bill of Sale or other proof of purchase. In order to obtain warranty service, contact the authorized Canon retail dealer from whom you purchased the

Equipment or call the CANON INFORMATION CENTER AT 1 — 800OKCANON.

This Limited Warranty covers all defects encountered in normal use of the Equipment and does not apply in the following cases: Loss or damage to the Equipment due to abuse, mishandling, accident, improper maintenance, or failure to follow operating instructions; If the Equipment is defective as a result of leaking batteries, sand, dirt or water damage; If defects or damages are caused by the use of unauthorized parts or by service other than by Canon USA's factory service centers or authorized service facilities; This Limited Warranty does not cover cabinet exterior finish, video cassette tape, head cleanings, nor does it apply to Equipment purchased outside the United States. This warranty does not cover units sold to rental firms, military operations, hotels, schools, hospitals or for other commercial, industrial, or institutional applications. This card is most important in order to be sure you are contacted right away should there be a safety inspection, modification or product recall under applicable laws or regulations. Scroll down to easily select items to add to your shopping cart for a faster, easier checkout. Visit the Canon Online Store. An optional accessory for the GL2, the BP945 can deliver up to three and a half hours of recording time using the viewfinder only or up to 200 minutes when the LCD screen is used. Times vary depending on camcorder. 7200mAh. It will charge one battery at a time. Once the batteries are charged, the CH910, with batteries in place, can be clipped to your belt and then connected directly to a Canon Digital Camcorder. This will give you twice the recording time of just one battery. It can be used with any combination of Canon BP900 series Lithium Ion batteries. There is also enough room to store additional battery packs, MiniDV cassettes and the WD58H wide converter, etc. It accepts a Lithium Ion battery pack for power and is attached to the camera's accessory shoe.

Register a free business account Please try your search again later.This camcorder borrows most of the professionalquality components from the XL1 and puts them into a more compact, affordable camera.

Though its small enough to carry around and doesn't cost much more than a top-of-the-line consumer camcorder, the GL1 produces such high-quality results that it could be used as a broadcast video camera. Great movies start with great CCD sensors, and Canon cuts no corners here. For the best possible picture quality, they use three separate 270,000-pixel CCDs one for each primary color. To further improve image detail, Canon has intentionally shifted the green CCD half a pixel horizontally and vertically. This shift allows more accurate interpolation, resulting in an image that Canon claims rivals those from cameras with 410,000-pixel CCDs. Each pixel is 72 square microns, which is about 1.5 times the size as those in competing camcorders. This increased size increases light sensitivity, allowing you to shoot in lower-light situations. Ultimately, the larger pixel size results in an improvement of 4 dB loss budget in sensitivity. For great optical quality, the GL1 uses a fixed nonremovable 20x optical 100x digital zoom L-series fluorite lens. The fluorite element in the lens increases sharpness and contrast, as well as helping to preserve color fidelity. Audio is recorded through the built-in microphone, which features two pairs of pickup elements. Audio can be recorded in 16-bit mode on two channels on one track. Alternatively, audio can be recorded in 12-bit mode, where

the audio track is divided into two, and two channels of audio are recorded onto one track, with the other left over for audio dubbing. The electronics of the GL1 have many advanced features, including a number of programmed AE modes, as well as both shutter and aperture priority modes. There are two different auto modes, one of which allows you to adjust any setting manually, if you want, and the other, which adjusts every setting automatically and lets you adjust nothing. A spotlight mode automatically compensates for lighting difficulties when shooting a subject bathed in a spotlight.

Finally, a sandandsnow mode is designed to prevent dark, underexposed subjects in situations with bright backgrounds commonly found in sandy and snowy areas. There are also three different shooting modes normal movie mode, digital photo mode, and frame movie mode. Normal movie mode is for any time you want to shoot video footage. Digital photo mode records a still image for six seconds on the miniDV tape, and also captures any audio, such as a commentary. The frame movie mode records 30 still images per second, but it isn't intended to be used for shooting video. Rather, frame movie mode should be used as burst or continuous shooting mode, as you'd find on a still camera. The GL1 uses an IEEE 1394 port for digital editing and for transferring footage to and from other IEEE 1394 compliant devices. The camcorder also has RCA composite audio and video ports, and an SVideo out. The analog inputs allow you to transfer old footage to DV for archiving. Built-in effects include a fader for transitions, black and white, slim, stretch, and strobe. Picture adjustment is also possible; you can adjust camera sharpness, softening or sharpening your subject, as well as the color tone and how dark or light the camera sets the autoexposure level. To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. Bowlist 5.0 out of 5 stars Camera is in very very good condition and shipped promptly. It works well if you're just recording on cassette. The MiniDV is cumbersome. My next video camera purchase will be SD card. Unbelievable picture and sound quality can be attained with this camera. One of the best in its price class.

Ate a tape once and cannot fast rewind tapes so i use my external rewinder there were several scratches on the housing but other than that it was worth the money and the seller response was aces. Vi giver dig altid frit valg mellem alle vores kanaler, og med Boxer Flex8 kan du også vælge op til 3 streamingtjenester. Vælger du Boxer Max er TV 2 PLAY, Viaplay og Dplay inkl. Og du kan selvfølgelig også se alle DRs kanaler med dit Boxerudstyr. Du skal derfor ikke vælge dem, når du bestiller dine tvkanaler hos Boxer. DR K lukker, men dele af indholdet fra DR K vil rykke over på DR2. Du skal bare vælge de kanaler, du vil se, så kan du se dem på dit tv eller på en af dine andre skærme med Boxer Play. Vil du også have streaming, som f.eks. Viaplay eller Dplay. Så kan du få det hele, her hos os. Har dit tv ikke en kortholder kan du købe det i shoppen. Har du et ældre tv fra før 2011, kan du også få en Smartbox. Skal du bruge flere, kan du købe dem i shoppen for 399 kr. pr. stk. din månedlige pris stiger ikke. Husk også at købe et tvmodul, så du kan stte kortet direkte i dit tv. Den er ikke større, end den kan stå i vindueskarmen og tilmed super nem at tilslutte. Du bestiller den i shoppen. Vi klarer installationen for dig og laver en kanalsogning, så du bliver helt klar til at se tv. Det koster mindre, end du tror. Boxerkortet indsttes i modulet, som indsttes direkte i dit tv. Et Boxer Tvmodul koster 399 kr. engangspris. Du bestiller den i shoppen. En Boxer Smartbox koster 799 kr. engangspris. Så kan du se alle tvkanalerne i dit abonnement på mobil, tablet, computer, Apple TV 4 samt via Chromecast overalt i Danmark og på din ferie i EU. Og du får ekstra nabolandskanaler med oveni glder ikke Boxer TV 2 kort. Se dine muligheder nedenfor og vælg det, som passer dig. Derudover kan du se snigpremierer på de mest populære programmer. Og selvfølgelig Viaplays populære realityserier. Glder ikke Boxer TV 2 kort. Indeholder ikke livekanaler.

Så får du adgang til serier som Avatar, Alvin og de frække jordegern, Svampebob firkant, Ninja Turtles og meget andet. Ud over frit valg af tvkanaler og streamingtjenester kan du også få bedre,

billig bredband. På Mine Sider finder du dit selvbetjeningsunivers, så du kan ordre alt det praktiske, når det passer dig. Og med Boxer Bonus er du automatisk med i månedlige konkurrencer om flotte premier. For hver måned du er kunde hos os, får du et antal Bonuslodder, som er med i puljen, når vi trækker lod om masser af flotte premier. Jo længere du er kunde, jo flere Bonuslodder får du. Du er automatisk med og behøver ikke foretage dig noget. Antallet af Bonuslodder afhænger af, hvilket abonnement du har, og hvor længe, du har været kunde hos os. Du kan tjene ekstra Bonuslodder, hvis du hjælper os med nogle få oplysninger, f.eks. din email. Læs mere på Mine Sider Vi trækker lod om premierne den 10. i hver måned, og vi finder mindst 75 vindere hver måned. Hvis du er en af de heldige vindere, får du direkte besked pr. email. I can fix the settings and take mirror image off HP Officejet Pro L7680 AllInOne question. The XL2 is the big brother to the GL family and the successor of the similar looking Canon XL1s. It is succeeded by the Canon XLH1 with a similar 20x lens and similar design, but in black. The Canon XL2 was designed to be very customizable, along with an array of prograde features.
